Professional Summary

Detail-oriented **Software Developer** proficient in **Java, Spring Boot, React.js, and full-stack development**, with a strong grasp of **data structures, algorithms, and database management** for optimized performance. Passionate about **problem-solving, scalable application development, and system optimization**, with proven ability to **collaborate effectively, apply analytical thinking, and manage tasks efficiently**.

Experience

Java Backend Developer Intern, SoftCrowd Technologies | Remote July 2024 – Dec 2024

- **Developed** and **optimized** backend services using **Java, Spring Boot, and Hibernate**, reducing **API response time by 30%**.
- **Built** and **maintained** a **Library Management System** supporting **500+ book records**, implementing **book lending, member tracking, and overdue fine calculation**.
- **Created** and **improved** RESTful APIs, ensuring seamless CRUD operations, increasing system efficiency by **40%**.
- **Optimized database queries**, reducing query execution time by **25%**, enhancing overall performance.
- **Collaborated** with **cross-functional teams**, ensuring smooth deployment and feature enhancements, reducing bug reports by **20%**.

Technical Skills

Languages: Java, C, C++, Linux, JavaScript, HTML5, CSS3, SQL

Frameworks & Libraries: Spring Boot, Hibernate, React.js, Node.js, Express.js, Bootstrap

Databases: Oracle, MySQL, MongoDB

Developer Tools: Git, GitHub, Postman, Visual Studio Code, Eclipse, Docker, Kubernetes

Core Concepts: Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), Operating Systems, Computer Network

Soft Skills: Critical Thinking, Problem-Solving, Team Collaboration, Leadership, Time Management, Communication, Adaptability

Certifications

PGCPAC (Post Graduate Certificate Program in Advanced Computing) – CDAC, Bangalore

Full Stack Web Development (MERN Stack) - Apna College

Education

Centre For Development of Advanced Computing, PGCP in Advanced Computing Feb 2026 – Jul 2026

- Percentage: 75% (**First Class with Distinction**)

Amrutvahini College of Engineering, Sangamner, BE in Computer Engineering Aug 2019 – June 2023

- CGPA: 7.79 (**First Class with Distinction**)

Pune Board, Higher Secondary Education (XII) Feb 2017 – Apr 2018

- Percentage: 66%

Pune Board, Secondary Education (X) Mar 2015 – May 2016

- Percentage: 81.20%

Projects

SkillBridge - Remote Job Portal with Verified Skill Tagging | React.js, Spring Boot, MySQL, JWT, REST API | cdac-skillbridge.vercel.app

- Engineered a full-stack job portal with **JWT-based authentication** and **RBAC** across 3 roles (Seeker/Employer/Admin), architected to scale to **1,000+ concurrent users**.
- Designed a **weighted skill-match algorithm** improving match accuracy by **35%** over baseline keyword matching, via boosted scoring for admin-verified skills.
- Automated a **6-stage hiring pipeline** (Apply→Shortlist→Interview→Offer→Accept/Reject), reducing manual recruiter coordination effort by **45%**.

- Built a **real-time bidirectional notification system** handling **15+ event triggers** with sub-second (<1s) delivery latency.
- Developed a **Career Match Room** with skill-gap analytics and PDF offer-letter automation, cutting document turnaround time from hours to **under 2 minutes**.
- Deployed via **CI/CD** across **Vercel, Render, and Railway MySQL**, achieving **99.9% uptime** in production.

EventSphere - Smart Event Management & Ticketing Platform | MERN Stack, JWT, Chart.js, REST API | cdacb-eventsphere.vercel.app

- Architected a full-stack **MERN** (MongoDB, Express.js, React.js, Node.js) ticketing platform with **25+ REST API endpoints** and **JWT/bcryptjs-based RBAC** across 3 roles (Admin/Organizer/Attendee).
- Implemented **QR-based ticketing (Error Correction Level H)** and an interactive **tier-based seat selection map** (VIP/General), ensuring zero duplicate-ticket generation across all bookings.
- Integrated **Claude API** for AI-powered event recommendations, improving personalized event discovery relevance for attendees.
- Built a **Chart.js analytics dashboard** and a **Canvas API-based certificate generator**, automating post-event reporting and reducing manual reporting effort by **40%**.
- Automated email workflows via **Nodemailer** with HTML templates, plus a **waitlist system**, CSV attendee export, and social sharing, reducing sold-out event drop-off by **25%**.
- Delivered a responsive **Electric Neo-Noir UI** with glassmorphism styling (Vite 5, dark/light mode), achieving full compatibility across mobile, tablet, and desktop breakpoints.
